

Dear GameCredits ecosystem and community,

I am writing to you on behalf of the **new movement to initiate a nonprofit organization** that is gathering members, individuals and businesses, around the goal of making GameCredits, GAME, the globally adopted gaming cryptocurrency.

A decision was made to call this organization the **GameCredits Foundation** (acronym GCF) and I, Nenad Tanaskovic, was selected as the Acting General Secretary a few days ago.

The current situation with **GameCredits does not live up to the expectations** of the great community that was growing and following it during the last 3 years. Game is an ambitious project with the intrinsic capacity of reaching the ultimate goal of any cryptocurrency, massive adoption. The GCF made the decision to focus on the original plan: the integration of Gamecredits as payment solution designed to extend blockchain benefits to gamers and developers as well. **We are here for you, to continue the fight for this great idea.**

Wise people ask: will you be part of the problems or will you be part of the solution? The GameCredits Foundation will focus on solutions which are positive for GAME. Anybody who is interested, solution oriented, and decent, will be welcomed to participate in our effort. Our message to all is: **if you can help GAME to grow, please get involved.**

There are a lot of technical and operational challenges facing GAME at the moment:

- Integrity and technical support of the GAME network and Core Client
- Sustainable technical growth of the GAME network and services
- A simple and appealing platform for GAME business opportunities
- Getting the community more involved in GAME growth
- Transparent, truthful, and clear communication regarding all GAME affairs

The GameCredits Foundation is focusing on addressing these challenges. One more challenge: **our current efforts depend on people donating their time and experience.**

We need to think big, but we must take small steps forward to:

- Establish a formal entity for GCF as a nonprofit organization
- Organize sustainable funding of the GCF through memberships and donations
- Establish bylaws and a proper GameCredits Foundation organizational structure
- Organize the first formal GCF event in the near future

With a lot of confusion and mixed emotions in the market, the GCF might be exposed to negative comments for an initial period of time. This is to be expected. All the comments, both positive and negative, will be seen as helpful as they will indicate that GCF is making an impact. **I urge everyone to base any comments on facts and actual results, not rumor or impressions.**

I will do my best to coordinate the initial GCF establishment and initiate sustainable growth. I also hope to motivate and mentor the new recruits with the goal of finding an even stronger future candidate to serve as GCF General Secretary position.

In Summary, The Foundation will work towards solutions which are positive for GAME, welcoming all interested, and solution oriented supporters to join our efforts. Without ignoring the past, we will be building a wiser environment for the future. We intend to face our challenges with positive and transparent efforts.

I wish us all an interesting and successful journey.

Best Regards,

Nenad Tanaskovic

Acting General Secretary

The GameCredits Foundation
